

Padma Bridge Paragraph 150 Words

The Padma Bridge is a highly anticipated infrastructure project in Bangladesh That will connect the western and eastern regions of the country. The main bridge length is 6.15 km and the width is 16.10 m. The bridge from Mawa in Munshiganj district to Jajira in Shariatpur district has two layers.

Padma Bridge construction started in 2014 and is anticipated to finish by 2023. It is one of the biggest infrastructure projects in Bangladesh and is being funded through a combination of government resources and international loans. The Padma Bridge is being implemented by a consortium of international and local contractors and is being overseen by the Bangladesh Bridge Authority.

It will also create job opportunities during the establishment of a foundation for future economic growth and development. Moreover, the bridge will contribute to poverty reduction and improve the standard of living for people in the western and eastern regions of the country. It will become an iconic symbol for Bangladesh, a testament to the nation's ambition and determination, remembered for generations.
